

COMPULINK SHOWCASES SMART EHR MULTI-SPECIALTY SOLUTION AT HIMSS 2019

Newbury Park, CA—Compulink Healthcare Solutions, the creator of Advantage SMART Practice®, an all-in-one EHR and practice management solution powered by artificial intelligence (AI), demonstrated its multi-specialty solution, Compulink Advantage™ at HIMSS Annual Conference & Exhibition.

Advantage uses AI technology and real-time data from the clinic to completely automate tasks such as billing, along with eliminating steps to improve patient flow.

Among the innovative AI-driven features demonstrated:

Advantage SMART Workflow®:

Advantage knows which patients are being seen based on their room assignment and automatically displays their record when needed. The system also lets providers and staff know who is waiting, where they need to go next, and keeps them constantly informed for maximum efficiency.

SMART Automated Billing, Eligibility & ERA Posting:

Using the Advantage PracticeWatch® task automation engine, staff can schedule eligibility, claims submission, and remittance posting to run unattended. Advantage also automatically populates a claim edit worklist to quickly identify and correct issues.

Advantage SMART Patient Engagement™:

Advantage automatically communicates personalized content directly to the patient’s mobile device. This includes information about products and services specific to each individual patient as they arrive at the office and move through the normal patient workflow.

“We expect this release to take our client’s efficiency across their entire clinic to a whole new level,” said Link Wilson, CEO and founder of Compulink. “Our SMART billing features will reduce the amount of time required to generate and work claims by about 90%. With our SMART workflow engine, we’re looking for patient throughput to increase by as much as 15% or more. And with our mobile patient engagement, the ability to engage patients in their own care while growing your patient base is really limitless.”

Among Compulink’s key innovations is a single database architecture that allows Advantage to serve up templates, workflow, and content (e.g. diagnosis codes) to support the provider’s individual specialty, while allowing the entire care team to easily share information.

The company’s 2015 ONC Certified system is used by more than 20,000 providers in over 4,700 locations and 40 ASC. Its all-in-one solution includes specialty-specific EHR for 18 specialties, practice management, ASC, inventory management, patient engagement and workflow optimization. The company also provides an expert revenue cycle management service for its clients.

About Compulink Healthcare Solutions

A leader in specialty-specific, all-in-one EHR and Practice Management solutions for 34 years, Compulink’s Advantage SMART Practice® uses artificial intelligence to improve clinical and financial results. Designed to maximize your time while seeing patients, Advantage includes everything you need to optimize workflow including EHR, PM, ASC, patient engagement, and RCM.
